Fig. 11

The diagram illustrates a device 20 with a grid of circular elements. Four rectangular elements, labeled 1110, 1111, 1112, and 1113, are positioned at different angles relative to a central vertical dashed line 1116. These elements are grouped into three horizontal sections: 220 (top), 221 (middle), and 222 (bottom). The angle between each element and the dashed line is denoted as β_1 , β_2 , β_3 , and β_4 respectively. Horizontal distances from the dashed line to the centers of the elements in sections 221 and 222 are labeled c_1 and c_2 . Various other components and boundaries are labeled with numbers such as 1102, 406, 1115, 1114, 1111, 1110, 1117, 1116, 1130, 1113, 1112, 1120, and 212.
